

DNA Segmen

Delivering Results

Mission, Vision e Values

Mission

Provide services and equipment for the oil and gas and engineering industry.

Vision

- ❖ Replicate our success by becoming a reference company in the oil and gas industry in Mozambique.
- ❖ Conquering by the quality and safety of our services.

Values

1. Teamwork is our motto.
2. Creativity and initiative are what makes us different.
3. We meet the expectation of those who count on us.
4. We value determination.

INTRODUCTION

Dyna Segmen Mozambique S.A. is a subsidiary of Dyna Segmen SDN BHD based in Malaysia.

In August 2020, the company was incorporated in Maputo-Mozambique, and has since replicated the successful business models of Dyna Malaysia to extend service and support provisions to clients who have regional offices or subsidiaries here as well.

Dyna Segmen Mozambique S.A. is growing and thriving with a capable team of engineers, IT professionals and geologists, providing various engineering and (ICT) services to various multi-national companies.

Operations in Kerteh, Bintulu, Miri, Tronoh, Korea, Mozambique, Oman and Qatar.

DYNA SEGMENT Mozambique provide multiples services that vary from Engineering to IT.

Oil & Gas

- Maintenance;
- Construction;
- Operation.

Engineering

- Civil and Structural;
- Mechanical and Piping;
- Electrical and instrumentation;
- Offshore.

IT technologies

- Big Data and Analysis;
- Web, App and System Design;
- IT Outsourcing Services;
- QA and Software Testing.

CONSULTANCY:

- Technical assistance in the preparation of development plans (PoD) for oil and gas.
- Consultancy/technical assistance in the elaboration of engineering plans.

OUR COMPANY (ENGINEERING)

OIL & GAS

Dyna is specialized in the Oil and Gas industry and our clients include refineries and petrochemical plants, which have faced subsidence problems over the years of operations.

In addition, the company also has experience in civil buildings, having worked with C&S Engineering firms for several Oil and Gas projects.

MECHANICAL AND PIPING

One of the challenges in onshore and offshore facilities is the deterioration of pipes and fittings. Dyna is involved in engineering solutions, having designed replacement piping systems and engineered online repair and inspection methods which have saved clients from downtime.

Dyna also works with M&E engineering firms for civil works within the Oil and Gas Industry.

ELECTRICAL AND INSTRUMENTATION

MOVs and HVACs are some of the E&I systems which Dyna designs and engineers. Being the agents for specialized products such as valve, actuators, transmitters and gauges, Dyna works hand-in-hand with manufacturers to design E&I systems for clients.

OFFSHORE

Dyna is involved in several proposed projects for clients in the region. The projects entail nava land structural engineering, ranging from FPSO conversion to drilling rigs to MOPU and FPU's.

Dyna also designs process skids for floaters.

OUR COMPANY (PROCUREMENT)

Dyna has been procuring equipment, material, spares and consumables for O&G majors and power plants for the past 8 years. We procure and deliver thousands of items annually, ranging from structural to mechanical to E&I.

Electrical and instrumentation Scope of Procurement :

- Temperature Transmitters and Gauges;
- Pressure Transmitters and Gauges;
- Vibration Transmitters;
- Switch Controllers;
- Electric and Hydraulic Actuators;
- Flow Meters;
- Well Head Control Panels;
- Fire and Shutdown Systems/ Panels;
- Signal and Power Cables;
- HVAC;

Mechanical Valves:

Gate, Ball, Choke, Check, Butterfly, Pipes, Elbows, Tees Steel Plates and Bars Flanges, Fittings, Saddles Clamps, Supports, Nuts and Bolts Engine/ Generator parts.

OUR COMPANY (IT)

Digital solutions:

Many times, our clients shared with us their dilemma, whether are simple problems such as panel control (front end) or complex ones such as optimizing operations and production of refineries.

Dyna is capable of building and implementing personalized digital solutions for our clients.

In addition, what set us apart is the fact that we are not just an IT company, but also an IT engineering company with dominion in the industries we serve. Our team is certified in chemical, mechanic, electric and petroleum engineering.

Big Data:

Our data analyst and experts have the ability of cleaning data, sift and prepare row data to do a deep analyzation.

Moreover, the creators and managers of data storage and data lakes in pro or clouds are our main area of work. Our data scientists and experts work eagerly to develop algorithms and deep learning models to help our clients make solid decisions such as develop operation in green and brown installation. Dyna also dive in cutting edge computing, a powerful tool to process big data in the field.

Web development:

Dyna offer web development in outsourcing solutions and powerful applications to automate your business. Dyna also offers complete web conception a codifying web pages with interactive web application.

Outsourcing services of IT:

Dyna offers the flexibility to contract programmers, designers to work directly with you through our company with the comfort of having your own team without having to hire.

In addition, we have a wide array of professional solutions in IT at your choice, contact-us with your requirements and we will be in touch with the right resumes.

OUR COMPANY (CONSULTANCY)

Technical assistance in the preparation of development plans (POD) for oil and gas

For any good extraction of oil and gas, an area study is necessary. Long-term planning is required for field operations and investment.

In addition, the PoD covers the entire productive life of the field and describes the geological model of the field area, the reservoir model, the reservoir management methodology, the number of planned wells, the design bases of the facilities to be implemented, predicts the curve of fluid production, sets the forecast of deactivation of the production and flow system and also presents the economic aspects of the project.

The main functions of the POD are: to allow the monitoring of activities by the regulator and demonstrate compliance with laws, rules and regulations, in addition to the application of best practices in the oil and natural gas industry.

Consultancy/technical assistance in the elaboration of engineering plans.

Dyna has a highly qualified team with proven experience in different areas, a vast knowledge in terms of Engineering that allow it to provide advice to the owner of project in a very wide range of specialties.

Namely:

- Hydraulic Infrastructures;
- Geology and Geotechnics;
- Industrial Infrastructures;
- Project management;
- Rural Development.
